

**Kodak** i1190WN Scanner

## Shareable. Powerful. Versatile.

Transform Your Office with Our Wireless Network Scanner

# Let Your Workplace Break Free

With the i1190WN wireless network scanner, you can share one scanner with many users. It's the perfect solution for today's open office and for work collaborations.

## Performance to maximize your productivity

The i1190WN offers smart image enhancements that produce impressive looking images with dramatically faster results. Perfect Page image processing performs processing functions before an image is delivered to your PC. And you can scan everything from ID and credit cards to a wide range of business documents, all at high quality and resolution.

## Intelligent design for reliable operation

Quiet and intelligently designed, the i1190WN can be trusted to reliably capture your important documents. It offers multiple layers of built-in document protection:

- Intelligent document protection "listens" for a telltale crumpling sound and immediately stops the scanning process
- Multi-feed sensor technology is designed to detect when two or more documents are being fed into the scanner

And when working at your desk or with customers, this scanner makes minimal noise so it does not disturb others around you or the customer you are focusing on.

## Simple set-up, scanning, and sharing

Compact and versatile, the i1190WN offers simple set-up and use. You have the flexibility of wireless network, USB, and/or network connections so you can place it where you need it. And setting up the scanner is as simple as scanning a QR code on a cover sheet.

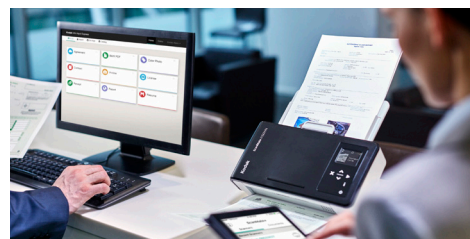

Once you are up and running, you can easily send data to the right places and people, including the cloud or the web, via an easy, icon-based color interface and one-button **Smart Touch** functionality.

## Seamless integration

For true efficiency, the i1190WN integrates easily with existing business applications using standard drivers. Or use the Web API to integrate your business application to the scanner directly without the need for a driver.

And for mobile users, the **ScanMate+** mobile app lets you scan quickly and easily to a tablet or mobile phone. The app is complimentary and available from the **iTunes** App Store or **Google Play** store.

## Adaptable solutions for your ever-changing workplace

### Software:

**Kodak** Capture Pro and Info Input Express Software, when combined with Alaris scanners, offer intelligent capabilities that increase your productivity.
